

VOTER CONFIDENCE COMMITTEE

Report on Election Conditions in Humboldt County, California

- Humboldt election issues in the context of nationwide problems
- Training poll workers
- Procedures, precinct workers, and polling stations
- Counting the votes

This report takes an in-depth look at these issues and offers concrete recommendations to improve the entire process. The VCC believes the public must take the lead in establishing a transparent, secure and verifiably accurate voting system. This system is hand-counting paper ballots. Please visit www.VoterConfidenceCommittee.org to download the report and contact info@VoterConfidenceCommittee.org for more information and to volunteer.

We appreciate donations to offset costs

VOTER CONFIDENCE COMMITTEE

We want our elections to be transparent, secure, and verifiably accurate. We support checks and balances, accountability, public oversight, and public participation in all aspects of the election process. We expect all aspects of ballot secrecy to be maintained. We expect votes to be counted in public. We want our elections to be a citizen-owned process.

To these ends we ask the following:

1. Get rid of hack-able, computerized secret vote counting machines.
2. Hand-count all paper ballots cast in an election at each precinct.
3. Resume using voting booths with curtains to better ensure the secret ballot.
4. Eliminate mandatory mail-in ballots, which can never be as secure as those cast in a polling place.
5. Improve training of election workers.

Vote in Secret; Hand-Count in Public
